Super First Study

c. 2025 Chris Braun chrisbrauntrumpet.com

The is a modified version of Herbert L. Clarke's First Study exercise from his *Technical Studies* method book.

Purpose: To gain optimal embouchure control on verticle and horizontal playing.

- 1. Use a steady air stream blowing through lines
- 2. Play each note with the same sound and quality
- 3. Start exercise with a fermata then blow through lines
- 4. Repeat the first measure 3 times
- 5. Play the tritone partion blowing through the notes not up to them
- 6. Hold the last note (Pedal tones are optional)
- 7. Play each exercise in one breath
